### **DETAILED ACTION**

The request filed on November 13, 2000 for a Continued Prosecution Application (CPA) under 37 CFR 1.53(d) based on parent Application No. 09/155642 is acceptable and a CPA has been established. An action on the CPA follows.

#### ***Species Election***

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Various bioactive agents.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:  
Claim 59, fluocinonide, omega-3 fatty acid and azelaic acid;

Art Unit: 1617

Claim 83, lipophilic anesthetic of the amide type;

Claim 84, clobetasol propionate;

Claim 95, betamethasone compound;

Claim 96, beta-methasone-17-valerate or betamethasonedipropionate;

Claim 97, corticosteroid;

Claim 98, androgens, estrogens and mixture thereof;

Claim 99, vitamins.

The following claim(s) are generic: claims 56-58, 60-82, 85-94.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The species listed above have widely varied chemical structure and different biological activities. Therefore, these species are distinct each one from the others, and can not represent a single special technique feature.

4. A telephone call was made to Mr. Benton Duffett on January 22, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the species to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
